Your home page is the first page that displays when you enter DukeHub. It is composed of two parts – on the left of the screen is a DukeHub CS Main Menu, on the right is work space for additional pagelets.

The Main Menu is a default value and will be present for everyone. Depending on your security, the items may appear differently than what is shown.

You will be able to customize the remaining portion of your homepage by adding additional pagelets. These pagelets provide links that give you direct access to Campus Solutions pages. Adding pagelets to your homepage will make navigating in the DukeHub a little simpler and more direct. Follow the steps in the graphic below to add pagelets.

The SISS Office will be adding new pagelets over time, so check back occasionally, or ask the functional lead for your area about what is available.
