DukeHub 2.0
Kickoff Meeting for Student Pilot Program
October 1, 2019
• Welcome and Introductions
  • Chris Derickson, Tommy Hessel, & Shrey Majmudar

• Brief Overview of the DukeHub 2.0 Project
  • Chris Derickson & Brenda Ratliff

• Why HighPoint? Overview and Demo
  • George Amalor

• Questions and Feedback from Students

• Next Steps
  • Liz Hutton
The system behind DukeHub is Oracle’s PeopleSoft - Campus Solutions (CS)

CS is an on premise (hosted by Duke) solution that is more than 20 years old

Like most student information systems, the future for Oracle is a cloud solution

No major system improvements or interface redesigns are expected for the remaining life of CS, which puts the burden on schools to upgrade and/or customize the product until the (inevitable) move to cloud
Deciding on the immediate future

- The current cloud solutions are not ready for Duke – and Duke is not ready for a cloud solution

- In order to improve our user experience for students, we had two real options
  - Continue to build out DukeHub using the technology for the original implementation
  - Choose a third party solution that would provide the design and development options that fit Duke’s needs

- After several months of research, demos, and internal discussions, the decision was to go with HighPoint’s Campus Experience (CX)
Why HighPoint?

• Already had an established relationship with the vendor
  • HighPoint Mobile
  • Schedule Builder

• HighPoint’s products are all “on premise,” which means the tools reside within PeopleSoft
  • This model allows for real-time transactions within the existing security of PeopleSoft/DukeHub
  • Uses all existing configuration and setup within PeopleSoft (i.e., business rules), thus simplifying the implementation
  • Does provide level of control over the product including ability to customize to better fit Duke’s needs

• Opportunity to be a development and design partner for Campus Experience (CX) and Degree Planner (DP), which means Duke – and you – will have a voice in the direction of the new DukeHub
Why HighPoint?

- Introduction of George Amalor for overview of HighPoint and demo of Campus Experience
Pilot programs for DukeHub 2.0

- Details on Pilot Programs:
  - **Students** – around 250 students to use DukeHub 2.0 to register for Spring 2020 classes
  - **Advisors** – Academic Advising Center (8-10 advisors) to have early access to DukeHub 2.0 starting in October
  - **Staff** – beginning a series of focus groups to gather requirements for move to Fluid navigation beginning in October
  - **Faculty** – small group of 15-20 faculty to use DukeHub 2.0 to grade courses for Fall 2019
    - Goal is to have a group broadly representative of Duke faculty (school, discipline, technological savviness, etc.)
What’s next?

- URL to access DukeHub 2.0
- ‘Bookbagging’
  - Opens 10/21
  - Office hours on 10/24 from 9-11, and 10/25 from 3-5
- Registration Schedule
- Reminders
  - Advisor meeting required prior to registration
  - Attendance at registration window is required
  - Feedback mechanism will be provided
