There are some exciting changes to DukeHub that are coming our way. Next year DukeHub 2.0 will be launched with a new look and feel which will improve user experience and add new features. Below are initial details you will need to know.

**Why are we changing?**
The system behind DukeHub is Oracle’s Campus Solutions, which Duke has been using for more than 20 years. While implementing DukeHub in 2016 was a start to updating the system, DukeHub 2.0 will continue on this path to provide a more modern look and feel.

**When will this happen?**
DukeHub 2.0 will launch in the summer of 2020.

**What will this mean to you?**
While some users will see additional features, all DukeHub users will see changes to the navigation and the overall look and feel. Over the course of the next several months, we will be providing additional information on the features of DukeHub 2.0, and we will be reaching out to the various user groups to begin discussions necessary to ensure this transition goes smoothly.

**DukeHub 2.0 Pilot**
During registration for spring 2020 classes in October, we will be conducting a student pilot to get initial feedback on DukeHub 2.0. Over the course of the next several months, we will also be working with faculty, advisors and staff to conduct additional pilots, or other ways to gather input. Stay tuned as we might be tapping you on the shoulder in the coming days for your help!
